

# WHAT IS A COMMUNITY RISK MANAGEMENT PLAN (CRMP)?

Our CRMP aims to explain how we plan to mitigate identified risks and improve community safety by aligning available resources with our key objectives and use them in the most efficient way.

**In developing our CRMP, it was crucial for us to review the progress made since we published our PSP in 2020.**

Further details of this review can be found on pages 10 to 15.

The term 'resources' includes people, skills, money, buildings, infrastructure, equipment and data.

Each FRS holds and has access to a wide range of data which it uses to help understand, plan for and respond to community risk. A summary of the resources available to us can be seen in the CRMP Overview on page 6.

Change is constant and our CRMP must evolve and adapt throughout its lifetime.

The diagram below illustrates the process of building and reviewing our CRMP:
