

## 2. Baiting the Sewers

Councillor Trendall (21 December 2022)

- “1. That this Council believes that:
  - a) in common with all large cities Milton Keynes has a rodent population which is problematic to control in some areas;
  - b) control of the rodent population is a complex problem, which requires a multi-track approach, for which there is no one solution; and
  - c) whilst the efforts of the City Council have had some success, a concerted efforts by all the parties involved is essential for a permanent reduction of the rodent population.
2. That this Council resolves to ask the Chief Executive of the Council to write to the Chief Executive of Anglian Water to request:
  - a) that the baiting of the sewers which they are responsible for be reinstated; and
  - b) that data concerning where baiting is taking place, and the outcomes resulting from that, be shared with the City Council’s Environmental Heath function in order that a co-ordinated approach to the matter can be taken.”
